Farmers of the Sugar River

2025 ANNUAL MEETING

WED, FEBRUARY 19
10AM- 3:15PM
REGISTRATION STARTS AT 9:30

Albany Lions Club, 402 N Cincinnati St, Albany, WI

GUEST SPEAKERS

Mike Miller, Stream Ecologist with WI DNR

Mike will give a background to help participants understand what neonicotinoids are, where they're found and their effect on all animals and in our environment.

Nick Tinsley, Technical Field Representative- Seed Treatment for BASF

Nick will share industry's efforts to find safer alternatives, how to handle treated seed, and choices that farmers have on treatment.

LOCAL FARMER PANEL

Watershed farmers that plant green will share their experiences and tips on how to make the practice successful and answer your questions. Planting green is a combination of cover crops and no-till. The cover crop is still alive (or green) when the corn or soybeans are planted and then sometime later the cover crop is terminated.

NITROGEN PLOTS IN THE COUNTY

There were four different nitrogen plots in the county. Plots were harvested in fall of 2024 and the results have been compiled. Jordan Sattler, UWEX, will lead the conversation and presentation to show the nitrogen use efficiency. This is a way to evaluate nitrogen management to help make economic and environmental decisions.

NEW INFORMATION

- Seed Treatments
- Manure Composting project results
- Nitrogen Plot Results

UPDATES

- Events planned this year
- Dan Truttmann shares his "Why" he farms like he does
- Network with other farmers!

Est. 2018
A Producer-Led Watershed Group
Farmers of the Sugar River
Promoting Conservation Practices

PLEASE RSVP BY FEB 14, 2025
